

Home Learning

If your child is home for a few days awaiting a COVID-19 test or you are isolating as a family, you may want to continue with your child's learning at home. You can upload any work you have been doing to Tapestry for the teachers to see.

The websites below give quick, easy lessons for children to follow. Many have video support. They are also organised into year groups and topics to make appropriate learning easy to find.

The topics your child is currently covering in class:

English:

Maths:

Other:

General – covering all areas

<https://classroom.thenational.academy/> - this is the website set up by the Government to support parents with home learning and provides resources for across the curriculum. There are units for EYFS and KS1. You could try to find a unit similar to what your child is currently learning about in school (see above) or pick something that may interest them.

<https://www.bbc.co.uk/bitesize/primary> - this is the BBC website that covers KS1 and KS2 but much of the work in the Year 1 section could be easily simplified for EYFS (particularly the English content, as this also includes phonics). You can also find resources that match our work in topic (e.g. plants, maps etc).

<https://www.hamilton-trust.org.uk/blog/learning-home-packs/> - the Hamilton Trust have produced home learning packs (including ones for Reception Classes). You can download and print them if you would like to. It's worth downloading the overview and looking at that before you choose a pack to make sure it is suitable for your child.

<http://www.crickweb.co.uk/Early-Years.html> - this is great for Year R children, giving a range of games and interactive activities that cover much of the work being done in class. They do work best on a PC or Mac.

<http://www.crickweb.co.uk/Key-Stage-1.html> - Crickweb also have a KS1 section that includes lots of relevant activities for Year 1 children.

English (phonics, reading and writing)

<https://www.phonicsplay.co.uk/> - this is a fantastic website with lots of phonics games that your child will enjoy playing, and helps them with the work they have been doing in class. You will need to log in using the details below to gain full access to the site:

User: march20

Password: home

<https://home.oxfordowl.co.uk/> - this website gives you free access to reading books and other support with reading at home. The books are tablet friendly and include many of the books we have at school.

<https://www.literacyshed.com/home.html> - this website has a full range of videos that your child can watch. They are designed to inspire writing and drama activities. There are also suggested activities that they could do afterwards.

The 'KS1shed' is the best place to look for appropriate videos for EYFS and KS1. We like 'Bubbles' from the Fantasy Shed.

Maths

<https://whiterosemaths.com/homelearning/> - this website gives maths lessons taught by video and accompanying resources and activities.

- Choose the year group that your child is in. These units will be broadly in line with what your child will be doing in school
- There are activities to do as part of the video. You can pause the video and complete these on paper.
- In addition, it is possible to buy a workbook or print a parent workbook from the 'primary resources' section, but these are not necessary.

<https://www.khanacademy.org/> - this website gives lots of lessons but the we think the Maths ones are the best. Your child will need to register for full access but the content is free.
